### KEY STRENGTHS

- Responsive UI Development**
- Proven ability to translate design concepts into pixel-perfect, cross-browser compatible interfaces using modern CSS and React.
- Component Architecture**
- Skilled at decomposing complex UIs into reusable, testable, and maintainable React components.
- Problem-Solving**
- Analytical approach to debugging and optimizing frontend performance, with a focus on user experience.
- Continuous Learning**
- Rapidly adopts emerging technologies; independently learned React 19 and Tailwind CSS v4 to build production-ready projects.

### PROJECTS

- FoodNova**  
*A full-stack restaurant management system designed to streamline order processing, inventory tracking, and customer management for improved operational efficiency.*
- Architected a modular, component-based SPA using React v19 and Vite, ensuring fast HMR in development and optimized production builds.
  - Built a responsive design system with Tailwind CSS v4 and seamless client-side routing via React Router for a fluid, page-reload-free experience.
  - Managed global state using React Context API across dedicated contexts (cart, auth, catalog) and persisted data with a custom localStorage utility.
  - Integrated React Hot Toast for real-time user feedback notifications, enhancing overall UX across the shopping lifecycle.
